

I am concerned that changes would be made so the Airl Radio network would not be able to broadcast. Airl provides an alternative listening venue for my children that they enjoy. Many of the other music channels available even though they market to young people have songs that have sexually explicit and violent lyrics. Airl provides for myself and my children a station we can listen to and all enjoy. I like the fact that the format is Christian and the music presents things in a positive light, compared to the increasingly negative things present in our society today. Please consider this when you are making decisions to change the FM format.

Thank you, Tammy Velazquez
